Campaign 1: Florida & Texas Case Request

Nov 4, 2026 · @Luca Aceto

What we need right now

For Campaign 1, we are only taking cases from **Florida** and **Texas**. Please hold any cases from other states until we tell you otherwise.

Volume: 25 leads per day to start.

Test length: 2 weeks.

Every case must meet the criteria listed below. The goal is simple: only send cases that are strong, fresh, and clearly worth pursuing.

Case criteria

A case qualifies only if it meets **every** item below.

Criteria	Requirement
State	Accident happened in Florida or Texas
Accident timing	Accident happened less than 2 days (48 hours) ago
Police report	A police report was filed for the accident. Get the report number, or at least the police agency that responded
Injury	The person was injured and is getting, or will get, medical treatment
Fault	The person was not at fault
Representation	The person does not already have an attorney
Age	The person is an adult (18 or older)
Insurance	The other driver has insurance, and the policy details are known or can be confirmed

Accident types we take

We take motor vehicle accidents where police responded and filed a report.

Accident type	Examples
Car accidents	Rear-end, T-bone at an intersection, head-on, sideswipe, lane change, multi-car pileup
Truck and commercial vehicle accidents	18-wheelers, delivery vans, company vehicles, buses
Motorcycle accidents	Rider or passenger hit by another vehicle
Pedestrian accidents	Person on foot hit by a vehicle, including in parking lots and crosswalks
Bicycle accidents	Cyclist hit by a vehicle
Passenger injuries	Passenger in any vehicle, including Uber, Lyft, taxis, and friends' cars
Hit-and-run accidents	Only with a police report, and the injured person has uninsured motorist coverage

We do not take slip-and-falls, dog bites, workplace injuries, or medical malpractice in this campaign.

Priority signals: cases that are easy to open

The best Campaign 1 cases have EMS involvement and an ambulance ride to the hospital. Send these first. The more of the signals below a case has, the faster we can open the file.

Signal	Why it matters
EMS responded at the scene	Documents the injury from the very start
Taken to the hospital by ambulance	Strongest proof of a real injury
ER or urgent care visit within 24 hours	Treatment starts right away, with no gap in care
Police report lists the other driver at fault	Confirms what happened and who was involved

Signal	Why it matters
Other driver was cited or ticketed	Makes fault clear
Other driver's insurance company and claim number	Lets us open the claim on day one
Vehicle was towed or not drivable	Shows a serious impact
Photos of the vehicles, scene, or injuries	Backs up the damage and the injury
Witness name and phone number	Supports who was at fault

What a strong case looks like

We want quality over volume. A strong case usually has:

- A clear, recent accident where the other party is at fault
- A real injury with medical treatment already started, or scheduled
- An insured at-fault driver
- A person who answers the phone and wants help now

Please do not send:

- Cases from any state other than Florida or Texas
- Accidents older than 2 days
- Cases with no injury or no treatment
- Cases where the person was at fault
- People who already have a lawyer
- Accidents with no police report
- Minors

Florida vs. Texas: what to know when signing

The biggest rule in both states: every lead must come from the person reaching out to us through an ad. Because we want accidents under 48 hours old, nobody may cold-call, text, or approach accident victims. Both states make that a crime.

Topic	Florida	Texas
Contacting the client	Soliciting accident victims directly, other than through ads to the public, is illegal. Reports say the ban runs 60 days after the crash. Crash reports are also confidential for 60 days	Barratry law bans soliciting accident victims within 30 days, in person, by phone, or in writing. A client can void a contract signed through barratry
Insurance system	No-fault. The client's own PIP pays first	At-fault. The at-fault driver's insurance pays
Minimum coverage	$10,000 PIP and $10,000 property damage. Bodily injury coverage is not required, so many at-fault drivers have none. Always ask about the client's own uninsured motorist coverage	30/60/25: $30,000 per person, $60,000 per accident, $25,000 property damage
Treatment deadline	The client must get first treatment within 14 days, or can lose PIP medical benefits. The full $10,000 needs an emergency medical condition diagnosis; otherwise it is capped at $2,500	No PIP deadline, but gaps in treatment weaken the case
Fault rule	Client recovers nothing if more than 50% at fault (since March 2023)	Client recovers nothing if 51% or more at fault
Deadline to sue	2 years for accidents after March 24, 2023	2 years. Claims against a city or government agency need notice within 6 months
Signing paperwork	Contingency agreement in writing. The client must receive and sign the Statement of Client's Rights, which includes a 3-day right to cancel	Contingency agreement must be in writing and signed by both the attorney and the client

This is a summary, not legal advice. The signing law firm should confirm each point before relying on it.

Next steps

Please start sending Florida and Texas cases that meet the criteria above. This is a 2-week test at 25 leads per day. At the end of the 2 weeks, we will review results and decide whether to raise volume, add states, or change the criteria.

If you are not sure whether a case qualifies, send it to us with a note before you submit it.
